**ABSTRACTED-PUB-NO:** SU 1120517A

**BASIC-ABSTRACT:**

The equipment includes stand (1) with driving mechanism (3) for V-shape drum (2) whose branched sections are extended by cylindrical sections (4) mounted perpendicularly to the rotation axis of the drum. The inner surfaces of all sections of the drum form a single volume equal to rotated capacity of the drum. The hatches (5) are for loading the components of the mix, the hatch (6) is for discharge of the mix.

**USE/ADVANTAGE** - The mixer for powdered substances can be used in prepn. of changes for further processing. Due to different velocity of sliding of the powdered material over surfaces inclined and perpendicular to the rotation axis of the drum, productivity is increased by a factor of 1.6 as compared with conventional V-shaped mixers, and the quality of the mix is improved.

**CHOSEN-DRAWING:** Dwg. 1/1
